OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 21

THE REDCLIFF REVIEW THURSDAY, JULY 21st, 1932

Number 39

Danes in Town Form a Society

Committee is Appointed to Arrange Program

Ever since locating in Redcliff our Danish citizens have met periodically in a social way for the purpose of becoming better acquainted and furnishing amusement and entertainment for both old and young of their numbers. These gatherings have been most successful and thoroughly enjoyed not only by the Danes themselves but also by others who have been fortunate enough to get an invitation. At these gatherings games of various kinds are played, musical programs arranged and dancing indulged in. So successful have they been that it has been decided to form a permanent Danish society and a meeting was held recently at which the following committee was appointed to arrange for the future program: N. Linnar, V. Anderson, J. Jorgensen, Mrs. Pederson, Mrs. Johansen. In all there are at present 50 members. The first social was held in the I. O. O. F. hall last Friday evening. It took the form of a dance and was well attended making a thoroughly enjoyable evening.

An effort will be made by the new organization to start a gymnasium in town this fall and have a physical training class to which the public will be invited to take part.

Legion Defaults Game To the Diamond D's

Failed to Appear for Scheduled Game Last Friday

The large crowd of fans which gathered at the football grounds last Friday evening were sorely disappointed when the Legion team failed to put in an appearance for the Five Roses game which was billed for that evening with the Diamond D's.

It was an ideal football evening; the pitch was in excellent condition; the attendance was larger than usual and the Diamonds had a strong line-up of the field. This favorable background made the disappointment all the more intense.

As the Legion officials had not sent any word that the team was coming, the crowd and the Diamond D players waited patiently until long after the time set for the game to start, had passed.

J. Fairless, the official referee for the occasion, then called the game and awarded the two points to the Diamonds as they were the only team on the field. Besides being a disappointment to the players and fans, the failure of the Legion to field a team also meant a financial loss to the Diamond D executives as they were done out of the gate receipts which promised to be one of the best of the season.

It is now being suggested that some ruling should be made whereby clubs refusing to field a team as scheduled, without some legitimate reason, should be penalized.

Imperial Conference Opens at Ottawa Today

Outcome is Looked Forward to With Great Interest

Delegates to the Imperial Conference have been arriving for the reception and accommodation of the delegates are working out without a hitch and the program for the Conference has been completed.

According to interviews with leaders of the delegations from all quarters of the globe, the outcome of the Conference is looked forward to with great hopes for its successful culmination. For this reason the proceedings from day to day will be anxiously followed with interest not only by the countries represented but by the whole world. The Conference will be officially opened today.

Leafs Gives Red Caps A Bad Drubbing

Defeat Them Twenty to Seven in Local League

Our Red Cap footballers took a decided lull Tuesday evening when they went down to a bad drubbing in their game with the Maple Leaf team. It was hard to believe they were the same Red Caps which played such a splendid game last week with the S. A. R. The visitors put it all over them in the "ton" of 20 runs to 7.

Poor fielding, costly errors, no-for-at with the willow and the indifference of the local players, showed an utter lack of practice and made more or less of a farce of the game. On the other hand the visitors were right there with the goods on every corner of the field, hitting and scoring at will.

The game was one of the poorest we have had this season from a spectators point of view but it was just a case of the Red Caps having a night off, a little practice should make a vast improvement for the next game.

Be sure to get your Swimming Pool Tickets this week.

St. Lawrence Treaty Signed by U.S. & Canada

Must be Ratified by Both Parliament and Congress

The St. Lawrence River Treaty, sought for more than a decade to open the great northwest with the sea-way from the great lakes to the Atlantic ocean, was signed Monday by the United States and Canada. H. L. Stimson, Secretary of State signed for the former and Hon. W. D. Herridge, Canadian Minister at Washington, for the latter.

The agreement must be ratified by the Canadian Parliament and the United States Congress before coming effective. Both Parliament and Congress must also appropriate funds for the construction of much of the 27 foot deep waterway from the St. Lawrence river to the lakes. It is estimated it will take ten years to complete the project, which will cost the two countries \$543,000,000.

Calties and Bricks Tie in League Game

Game Played Monday Was a 1-1 Draw

Another tie game was added to the long list in this season's football games when the Calties and the Bricks & Coal met in a league game Tuesday evening and played a 1-1 draw.

The game was very evenly contested all the way through, scoring early in the opening stanza the Bricks maintained their one goal lead through the period. So well were they meeting the attacks in the second half that it looked as though they would be able to carry their lead through to the finish, but, alas, just a few minutes before the final whistle McArthur shot a hot one through for the Calties to equalize.

In the second half Hope in goal for the Bricks saved the situation on several occasions.

There was no more scoring and not only did the game end in a tie but these two teams are also tied with five points in this fixture.

Farmers Meeting Not Well Attended

Was Addressed by Vice President and Director

There was a poor attendance in Cliff Hall last Monday evening for the meeting called by the local U. F. A. Norman Priestley, vice president of the provincial organization, and J. Foville, one of the directors, were present as advertised.

One of the reasons for the poor attendance here was that after arranging for the meeting in Redcliff as a gathering place for the several locals contiguous to town, these men held a meeting out of town in the afternoon. This naturally kept away a number who otherwise would have been here.

Mr. Priestley's talk was largely along organization lines in which he made a strong plea to farmers to join the U. F. A. and become interested in its business. He also stated that those other than farmers, who were in sympathy with the organization, could join provided they were acceptable to the local to which they made application.

Mr. Foville spoke along the lines of co-operation for farmers both in buying and selling.

Hon. Vernon Smith Died Suddenly Tuesday

Was Minister of Railways and Telephones in Alberta

Hon. Vernon Smith, Minister of Railways and Telephones in the Alberta government, died suddenly at his home in Edmonton last Tuesday evening. Mr. Smith who was 68 years of age has been a member of the provincial government ever since the farmers assumed power in 1921.

Deceased was an outstanding member of the present government and was most popular among the members of public parties. Ever since entering politics he has represented the provincial constituency of Camrose. Beside his widow he leaves four daughters and a son.

Mrs. Frank Jeric Passed Away Monday

Died in Hospital After Having An Operation

Mrs. Frank Jeric, sr., passed away suddenly in the Medicine Hat hospital early last Monday morning. Deceased had been a resident of Redcliff for a number of years. Last Christmas Mrs. Jeric met with an accident as a result of which the bone of her knee was badly bruised and from which she suffered for some time. Two weeks ago it was decided an operation was necessary. For this purpose she entered the hospital. The operation was performed and pronounced successful but a few days the patient complained of pains in the chest and otherwise not feeling well. Her condition gradually grew worse and at two o'clock Monday morning she passed away suddenly.

Deceased was 65 years of age. Besides her husband she leaves one son, Frank, who is at present on his farm in the Red Deer district.

The funeral took place from St. Patrick's church, Medicine Hat on Tuesday morning.

Thornton Resigns From The Canadian National

Resignation Accepted by Govt. And Directors

St. Henry Thornton who has been president and chairman of the Canadian National Railways for nearly ten years, has tendered his resignation and same has been accepted by the board of directors and the Dominion Government.

Mr. Thornton, vice president of the system, has been appointed acting president.

LOAN TO NORMAL STUDENTS IS STOPPED

Hon. Perron Baker, minister of education, has announced that loans to normal school students will be discontinued this year. It will depend on how many applications come in for normal training after exam results are out, on how many normal schools will be in operation next term. On December last there was a total of \$316,000 outstanding on student loans.

Wilfrid Thomson and his mother accompanied by Jean Peterson, motored to Calgary last weekend. Mrs. Schrimmer and her daughter returned with them to Redcliff for a visit.

The W. M. society of Gordon Memorial church held a flour sack and cake contest in the school room on Wednesday afternoon. Mrs. Hector Lang and Mrs. Milne of Medicine Hat were judges of the sack goods and Miss Lang and Pratt, of the cakes. The results of the judging were: 1st, Mrs. Bamforth for a pair of curtains; 2nd, Mrs. Morton for a pair of pillowcases; 3rd, Margaret Pow for an apron. For white cake Lillian Lening took first and Eleanor Learmonth second. For dark cake Jean Peterson took the prize. The cakes were baked by girls 16 years and under.

Best Football Game of Season Last Evening

Diamonds Win 2 to 1 in League Last Evening

Without doubt the best football game of the season was played here last evening when the Diamond D's and the Legion met in a league fixture and the Diamonds won out with a two to one score.

There was not a dull moment throughout the whole game and both periods were liberally punctuated with a fine exhibition of forward line rushes and just as fine work by both defenses. It was not until after 35 minutes play that Podesta finally scored for the Diamonds although if anything the visitors had a slight edge on the play up till that time. The period ended 1-0 for the Diamonds.

The second period started off with even more dash than the first, with the Diamonds having considerably the best of the argument until after 12 minutes play a scrimmage took place in front of their own goal and in his anxiety to save, T. Davies miskick the ball into his own net. With the score now tied the Diamonds wakened up as the seriousness of the situation put on as nice a series of attacks as has been witnessed this season. The onslaught soon told on the Legion defence and after ten minutes play Bill Patterson shot in a sizzler which was engineered into the goal mouth by Houston and Turner.

The score was now 2 to 1 with the Diamonds still going strong and the Legion defence sparing for wind. There was no more scoring.

The Diamond D's are now at the top of both the league and the Five Roses with six points in each. The Brick come next with 5 and 4 points respectively.

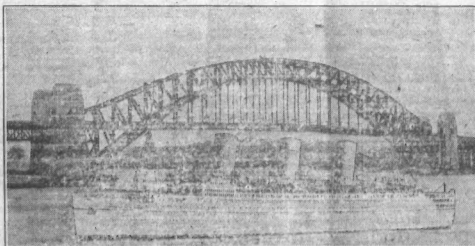

With growing deficits in federal, provincial and municipal governments and ever increasing taxes, the meek won't thank us for the earth when they inherit it.

Sykes Robinson, who took first prize in the bucking contest at Redcliff Stampede, took fourth prize in the North American Championship at Calgary third in the Canadian Championship event. Lora Thompson, who also rode at Redcliff, took first prize in the wild horse race.

E. Foy, one of last year's members of the Brick & Coal football team, returned to town last weekend from Montreal where he had been in the hospital for several weeks. He is now quite recovered from his illness.

Great excitement prevailed at the home of Mr. T. Dutton, sr. this week when a telegram arrived stating their son Joe had been successful in passing his first-class mining examination which now qualifies him to hold a position as mine manager. Joe will be remembered by old football fans as he was a popular football player when working at the Brick & Coal plant here. Good by Joe. We wish you success.

Splendid Empire Achievements

An enterprising Sydney, N.S.W., newspaper, in order to convey to its readers the magnitude of the huge new Empire Exhibition recently completed at the national port, printed the composite picture shown above for the enlightenment of its readers. Thrilled by descriptive stories of the new Canadian Pacific liner "Empress of Britain" that appeared in Australian papers when this giant liner was used on its maiden voyage last year by H.M.S. the Prince of Wales, Australians have taken as profound an interest in the "Empress of Britain" as Canadians, and the picture, entitled "Empire Achievement" sold out in the entire press of the Dominion and the Commonwealth. The liner was the legend, "Empress of Britain", 28,000 tons, "Empress of Britain" in service May 1931, length 703 feet 6 inches, breadth 97 1/2 feet, gross registered tonnage 25,000. The "Empress of Britain" on her voyage from Canada June 14th, 1931, justified Australia's faith in her as an Empire achievement by steaming the magnificent new record, Father Point to Chebourg, in four days, seven hours, 58 minutes.

WORLD HAPPENINGS
BRIEFLY TOLD

Eighty-two divorcees were granted in Ontario last year.

Milk has dropped to eight cents a quart in Ottawa, the lowest price since 1921.

The Pope has approved construction of a new power station to make the paper state self-sufficient so far as electricity is concerned.

Having a face value of eight cents, a South African emergency stamp issued 77 years ago, was sold recently in London for \$7.40.

Napoleon Bonaparte, of Springfield, Alberta, who acted as interpreter during the trial of Louis Riel in 1885, died recently at Calgary after a brief illness. He was 71 years old.

Officials of the Harbor Grace, N.B., airport, have received \$250 from Amelia Earhart's Futaba in appreciation of their services at the start of her trans-Atlantic flight.

The Prince of Wales has consented to become patron of a fund to replenish the old wooden battlements as a holiday training ship for boys.

Pett of the Canadian Pacific Railway police, Montreal, captured the individual high score trophy for 1932 in the Dominion "backgammon chief constable" revolver competition.

A high place in the New South Wales philatelic collection held recently at Sydney, has been awarded to Canadian postage stamps, according to announcement from the post department.

Depression has hit the medical profession membership of the Canadian Medical Association.

Depressed 300 this year, due largely to doctors in the west being unable to pay their fees. The total membership is 3,444.

Admiral Sir Eric Charles Chilton, commander-in-chief of British naval forces in the Mediterranean, will succeed Admiral Sir Frederick L. Field, first sea lord, as a lord commissioner of the admiralty and chief of the naval staff, in accordance with an order of the admiralty board effective February 23, 1933.

Where Milk Is Scarce

Settlement in Northern Manitoba Has Only One Cow

Although the government of Manitoba may take over the milk industry of the Province and operate it as a public utility, it is not expected there will be any change in the price of milk in the little settlement of Pitouk, where the Hudson Bay Railway has a division point. The milk industry there is a monopoly. One cow, Betsy Jane, controls the whole output and it sells for 10 cents a quart. Betsy Jane is the only cow so far able to survive in that part of the country, where winter conditions are not propitious to the dairy industry.

A Young Globe Trotter

Thirteen-Year-Old Chicago Boy Takes Trip Alone

The boy who created considerable publicity by his unaccompanied travels arrived in Winnipeg recently en route for Vancouver, to sail for the Fiji Islands. He is Harry Gerald, 13-year-old son of John D. Gerald, vice-president of the People's National Bank and Trust Company, Chicago. Each year this boy travels sets out on his own for some part of the globe, his last trip being to the Arctic in 1931.

A German who proposed to walk round the world got as far as Manchuria, where he married and settled down. A journey of this kind entails many dangers.

Almost one-half of the iron and steel produced in Germany last year was exported.

When Glen has had a night out, his "dick" witnesses the petty cash. Karikaturen, Oslo.

Old Fur Trading Contracts

Archival: Revealing Conditions In Early Days Of New France
Study of conditions in the fur trading business in the early days of New France throws a revealing light on the life of that period. R. E. Maas, Montreal, has written a book on the life of that period, based on interpretation of contracts drawn up between early French traders and settlers in the French exporting and exporting companies.

The archivist has traced 13,000 contracts signed between the years 1670 and 1770. It shows that traders went north, even in those early days, to travel in northern Quebec, to the Lake Superior district and west Lake Winnipeg. The contracts of some of the men who first ventured beyond the Rockies have been unearthed by Mr. Maas and his notes on subjects to publish his findings in this connection in volume form. Detroit and the southern United States received their quota of pioneers.

Few women were to the adventures. But as early as 1700 women took to the trail and soon afterwards whole families moved into the wilderness in search of pelts and forest game. "The women revealed the same fortitude and courage as men," says the archivist.

Prince Is Perfect Host

Staff Has Little To Do With Plans For Entertainment

Details of recent private and informal visits to the Prince of Wales reveal a side of him not little known to the public.

As a host the Prince places most of the parties himself, and leaves little to his staff. He selects the menu for his own guests, and has scores of recipes of his own, many of which he has collected in all parts of the world. He has very decided tastes in food, and takes enormous pains for his preparation.

At work in his study, the Prince invariably makes his own tea ("I always get it right then," he says), and for lunch usually takes only a business man's snack, probably a plate of cold meat and fish sandwiches.

The Prince's parties at York House are often held in the grey-and-silver room, an apartment with folding doors and alcove so constructed that it can accommodate dinner parties of all sizes. Even when the affair is a small one, there is a sense of ceremony and intimacy lacking in the usual huge Mayfair reception room.

Chance For Canada

Stimulated Cream Export Suggested By Henderson Station Firm

L.D. Henderson Station, Ltd., produce brokers in Montreal, have written to the Quebec Department of Agriculture, asking for information from England that sterilized cream in six-ounce tins were being imported into England in increasing quantities. The butter fat content, according to the letter, was approximately 25 per cent and the cream was 12 ounces for 40 tins.

In the past, the writer says, the great bulk of the supply was imported from the provinces of Ontario and Quebec. The letter concludes as follows: "It strikes me that if the Dean, who obtains the highest prices for butter in England can afford to deliver the cream instead of butter it might be worth while to investigate the possibilities closely."

Pays Visit To London

Madrid's Lord Mayor Made An Institution From An Individual

Don Pedro Rico, the lord mayor of Madrid, the heaviest lord mayor in the world, recently paid a ceremonial visit to London.

In Madrid Don Pedro is an institution rather than an individual. He weighs 280 pounds.

He was anxious that London should see and hear him in company of ancient Spain. He brought with him his crimson Cavalier cape, an article of apparel by which the robes of the Lord Mayor of London paid to insignificance.

France Has Dog Hotel

Catering to dog-owners who visit England and must leave their pets behind, because of quarantine regulations, luxurious hotel for canines is being erected in the mountains near Mentone, France. The promoters promise the latest in kennels and stress the benefit of exercising in the fresh mountain air.

Eggs, butter, milk and salmon are the main items of providing vitamins for through food.

New Method Of Farm Management

Colonization Finance Corporation Adds To Staff Of Zone Managers

The recent appointment of a staff of that city, at a recent meeting held in the home of Mr. J. B. Sommersfeld, like Mr. Reinhold, Prof. Sommersfeld has an exceptional academic standing as well as a practical experience which puts him in a class with the best farmers. He is now leaving for the Manitoba Agricultural College to take up the work of farm management for the important Saskatchewan district around Yorkton.

Prof. Sommersfeld was born on a Wisconsin farm, the son of the late J. B. Sommersfeld, breeder of purebred Holstein cattle, who migrated to Saskatchewan with his family and took up a three-quarter section of raw land in the Saskatchewan district. This was a very large production of wheat, which was sold for four years in the wheat production on the farm reached an average of 20 bushels per acre.

During this same period Professor Sommersfeld joined the pioneer class in Agriculture at the University of Wisconsin, where he graduated from that institution with the degree of B.S.A. He followed this up with a year at the University of Wisconsin from which he received the degree of Master of Science in 1922.

Seven years as professor of animal husbandry and farm management at the Manitoba Agricultural College followed. After attending the University of Minnesota, taking animal husbandry as a major, and agricultural economics and farm management as minor courses, he just recently received his degree of Ph.D. from the University of Minnesota.

Prof. Sommersfeld has been in frequent requisition as judge of livestock fairs and exhibitions, including Brandon, Regina and Saskatoon. He has also done work for the Saskatchewan Agricultural College, where he has been four years in the past, one of which was the Toronto Royal Fair.

When he was on the Ontario Agricultural College team. Prof. Sommersfeld has done work for the Agricultural Extension Headquarters at Brandon and Saskatchewan.

O. S. Longman, Indian Head, Sask. O. S. Longman, who takes over the management of the Indian Head, Sask. zone, is a Western Canadian. He was born near Carmichael, Sask. He grew up in the Deloraine, Man. district. He is a graduate of Manitoba Agricultural College, and has been instructor in agricultural mechanics, dairy husbandry and other farm subjects at agriculture schools at Deloraine and also Alberta. In 1920 he was appointed principal of the School of Agriculture at Raymond, Alberta, and in this capacity superintended irrigation demonstrations and extension service among the farmers.

At some time Mr. Longman has been on the staff of the Alberta Department of Agriculture and in this connection has conducted special investigations into conditions in the irrigated areas and drought stricken areas of that province. His report on the dry areas was published in the "Herald" of the C. R. M. A. by the Alberta Legation.

He has also made a study of the best irrigation system, a study looking to the establishment of a large best irrigation in Saskatchewan, control of noxious weeds, use of chemical fertilizers, and management of livestock.

Mr. Longman's appointment to the staff of the Colonization Finance Corporation was felt as a distinct loss to the University of Alberta, and was much regretted by the residents of Hanna and Deloraine.

Joe B. Day, Oxbow, Sask. Joe B. Day is another graduate of Manitoba Agricultural College. His appointment as farm manager for the Saskatchewan Finance Corporation. His headquarters are Oxbow, Sask. Day also has a degree of M.Sc. from the University of Minnesota. Agricultural economics are a specialty.

A son of Mr. Day's family settled in the Wilcox district more than thirty years ago. Mr. Day has been a resident of the farm for five years when he specialized in seed raising.

Prof. H. B. Sommersfeld, who has just received an appointment to the staff of the Colonization Finance Centre, was substantially welcomed to his new field by the Board of Trade

The Day farm was the one on which the Colonization Finance Corporation carried out an extensive experiment with fertilizers. Mr. Day has been connected with creameries and now testing corporations. He also was with the Manitoba Wheat Pioneers.

While he was studying for his Master's degree he was field manager for a survey of Minnesota. His ability brought him the offer of a position as agricultural representative in that state, but he refused, preferring to stay in Saskatchewan.

Oxbow, Wilcox, Canada, Sask.

As manager for the Canada zone, the Colonization Finance Corporation obtained the services of Oxbow Wilcox, a recent graduate of the Manitoba Agricultural College.

Mr. Winkler speaks a number of languages which will enable him to work effectively with the farmer clients in the Canada district, most of whom are of European birth or extraction. Already he has made his place in that district and his coming has been greatly appreciated by the farmers.

Mr. Winkler has been manager of a large sugar beet farm and resided in a land settlement project before coming to Canada. Since coming he has managed a large farm at Margo, Sask. Two years ago he entered Manitoba Agricultural College from which institution he was graduated this year with a degree of B.S.A. During last summer he did extension work for the Manitoba Department of Agriculture in southern Saskatchewan, with headquarters at Steinbach, Man.

Wynne, Harrison, Weyburn, Sask. William Harrison, who is in charge of the Colonization Finance Corporation zone at Weyburn, Sask. was born and raised on a farm in Manitoba. He was a member of the Manitoba Agricultural College.

Coming in the 3rd Battalion, British soldiers served overseas until 1919. Soldiers return to Canada he joined the 1st Battalion, British soldiers and served as a private and inspector, holding this position until 1920. While with the S.S.B. Mr. Harrison was supervisor in Southern Saskatchewan. He is currently Oxbow and Regina. He has been in charge of purchasing land, stock and equipment. In addition to his work among the soldier settlers he carried out special work in connection with the settlement of British families in the Saskatchewan district. He has a valuable period of service with a private mortgage company preceding his appointment with the C.F.C.

Kenneth D. McLean, Brit. Man. Kenneth D. McLean, one of the younger farm managers of the Colonization Finance Corporation, has been appointed to the zone at Brandon and Moosemen zones of management. He was born in the Brandon district, where his father is a resident of 30 years.

He has done survey work in economics for the Pioneer Problem Committee, and was in the River View district, and won the Co-Operative Marketing diploma in scholarship. He is the highest standing in economics in second and third years.

Only Chance For Rest

Writer-Had Good Reason For Using Ordinary Pen

Ed. Howe, writer and philosopher at Atholton, Kansas, dropped in at the Review office to buy a fountain pen. When he was put in the line, he said to the dealer could show him why he should have a fountain pen.

"Well," said the latter, "you do all your writing with a pen, just think of the time you could save in not having to dip your pen into an ink bottle."

"Young man," solemnly remarked the sage of Potato Hill, "when I dip my pen in the bottle that is the only time all day that I get any chance to rest. Do you want to work me to death?"

Recipes For This Week

(By Betty Barclay)

MARSHMALLOW FLUFF

(Serves 6-8)

1 cup cream.

½ cup sugar.

1 cup quartered marshmallows.

1½ cups orange segments.

Whip cream until thick, fold in other ingredients. Serve cold.

Variation: Use colored marshmallows—pink, green, orange—and add one small bottle marshmallow cherries. Cut oranges in half.

CHARGE AMBROSIA

(Serves 6)

6 oranges.

½ cup powdered sugar.

½ cup grated coconut.

Peel and slice oranges. Cut slices into halves or quarters. Arrange in serving dishes, sprinkle with sugar and coconut.

Professor—"Most of the objects found in the tomb of Tut-Ankh-Amen are covered with hieroglyphics."

Bhe—"Good gracious, how awful. But then I suppose they are all dead."

A Bulgarian is restricting the entrance of luxuries into the country.

The sweet pea is a native of Sicily.

Total Eclipse Of The Sun

Begins in Hudson Bay Area and Will reach its apex at 1:04 p.m.

In addition to the Imperial Tobacco Conference, there will be another event in Edmonton Canada. This summer, when the sun is at its zenith, universal attention, this will be the total eclipse of the sun on August 31st. The eclipse will be visible from a zone running through the Province of Quebec and skirting the City of Montreal.

Though usually total eclipses of the sun occur every seven years, the Director of the Canadian Government Observatory points out their occurrence as total at or near any specified locality is a somewhat rare phenomenon. The last one to be visible as total in Canada was on January 24, 1925, on which occasion the path of totality crossed across western Ontario, sweeping the Niagara River into the United States near New Haven, Connecticut. After the 1925 totality eclipse the next one to be visible in Canada will be in 1945.

For the 1933 eclipse the central line of the path of totality begins in the Arctic regions, sweeping down across Hudson Bay, skirting the eastern shore of James Bay; it crosses the St. Lawrence near Maskinonge, enters the Gulf of St. Lawrence, east of Montreal, and passes across the international boundary a few miles south of Weyburn, Sask. Vermont, passing into the Atlantic Ocean in the vicinity of Portland, Maine. The width of the shadow zone in southern Quebec is approximately 100 miles; the western edge passes through Montreal and near Boston, Canada; the eastern edge is about 25 miles to the east of Three Rivers, Que.

The duration of totality on the central line is about 100 seconds, diminishing to zero at the eastern and western limits. The shadow travels at an average speed of about half a mile per second, traversing the distance of roughly 700 miles from James Bay to the coast in a little over 20 minutes; it crosses the River St. Lawrence at 3:24 p.m. Eastern Standard Time, the international Boundary at 3:30 p.m. Eastern Standard Time, and the City of Montreal at 3:31 p.m. The direction of the sun at this time is about 20 degrees south of west and the altitude about 30 degrees.

Several parties of scientists from other countries are coming to observe the eclipse, and Montreal will be one of the principal points where these parties will concentrate in order to take advantage of the facilities and co-operation of McGill University.

Case Puzzles Doctors

Death Of Eleven-Year-Old Girl FREAK With Slight Strain

Physicians are puzzled over the case of Mary Hastings, Junior, Mich., who has never been in a serious accident, yet has broken nearly every bone in her body.

The 11-year-old girl was under treatment in a Chicago hospital by Dr. Frederick Harvey, of Northwestern University. She was suffering from a broken arm caused by a slight strain.

A physician said X-rays revealed nearly every large bone in her body had been broken at least once.

"The examination showed that the bone structure is so thin and brittle," said the physician, "that the slightest stress causes a fracture. She has 30 to 40 fractures."

German railways will run excursion trains with secret destinations.

The story of the discovery of stainless steel, a secret for several years, is not to be told for another three decades. Harry Brearley, discoverer of the process, has given the "secret company" of Sheffield a sealed envelope, admonishing the society not to reveal it until the centenary of 1860. The envelope contains his story of the discovery.

Freak Insurance Risks

Applications For Protection Cover Great Variety Of Things

The news from Paris that Kublik, the famous violinist, has cancelled the \$100,000 insurance policy on his hands in favor of a much larger (though unnamed) policy is a reminder that there is practically no limit to the risks against which insurance may be effected. The only proviso is that you must have an "insurable interest." That is to say, you may not insure against any eventuality which will not involve you in actual loss.

Shopkeepers near St. Paul's Cathedral were able to take out special insurance policies when there was said to be a danger of the cathedral falling down. The life of the late Tsar was insured by business men with interests in Russia for a sum estimated at well over a million pounds.

You may insure against twins, against breach of promise, against your fancy in the big race founder, against her loss of her hat, against weather spoiling your holiday, or against your daughter eloping.

A French insurance company is even willing to insure women against the possibility of failure to secure husbands. It must, one would imagine, be rather a delicate task to decide what the premium should be in some of these cases.

Cecile Sorel, of the Comedie Francaise, once took out a policy covering the risk of her hat being blown overboard on an Atlantic voyage. The hat was studded with diamonds and emeralds.

Truly the variety of possible insurance policies is immense. Here are some other instances of unusual insurance.

Miss Mable Poulton, the English film star, was insured for \$100,000. Miss Pearl White, the film actress, was insured for \$50,000.

M. Paderewski, the pianist, insured his hands for \$60,000.

Miss Venus Monconi, the dancer, insured her body for \$50,000. (She cannot dance unless she can hear the music.)

Polaire, "the Homeliest Woman on the Stage," insured her face for \$50,000. Her face has been the subject of thousands of cases in her ugliness is marred.

Miss Fay Marbo, the American actress, insured her smile for \$20,000.

Ben Turpin, the cinema actor, will get \$100,000 from an insurance company if his cross-eye becomes straight, and Alberta Vaughn's producer in Hollywood will claim \$25,000 if she acts too much candy and becomes rotund.

Rats Are Blamed

Scientist Claims Rodents Carry Typhus Germs

Announcement of the discovery that rats carry typhus was made by Dr. J. E. Ramsdell, director of the conference board of the United States National Institute of Health.

Ramsdell said three physicians of the National Institute of Health at Washington, D.C., discovered that the fever, formerly thought to have been carried by lice, is spread by rats.

"Eliminate rats and typhus will disappear," Ramsdell declared in an address in connection with Union College commencement exercises.

First Automobile Builder

Alexander Winton, Sr., pioneer automobile manufacturer, died recently in Cleveland. Mr. Winton was known as the first man who ever manufactured an automobile to sell commercially. He began the manufacture of motor cars in 1894 after establishing the Winton Bicycle Company.

Alberta's production of butter in 1931 was 22,937,922 lbs. This exceeds all previous records by over 600,000 lbs.

Oysters still rank as luxuries in Europe.

"I saw you kiss my wife! What have you to say about it?"

"If I could you saying again there will be trouble."—Kasper, Stockholm.

W. N. Y. 1848

NOTES ON GARDENING

Celery Is Easy Grow, Contrary To General Opinion

Contrary to somewhat general opinion, celery is not a difficult plant to grow, and a large quantity can be produced in a very small space, thus putting this vegetable in the city garden class. The first rows can be put out any time, now, with the main planting about the first week in July. Plants are produced from seed sown in the hot bed, or they may be purchased from almost any corner store at this time. The ideal soil is a very rich, well-drained mud, though practically any combination will do so long as we fertilize well, have good drainage and apply lots of water. Give the plants from six to eight inches each way and rows may be set close together as we like after making allowances for cultivation. Keep the ground thoroughly worked up all the time. Light applications of nitrate or soda just after the plants are set out and again in two or three weeks will help growth along wonderfully. The simplest way to bleach celery in the fall is to place boards close up against the plants on both sides of the row and bank with straw. In the fall, plants may be lifted without bleaching and stored, lightly placed together in wooden baskets, some dark place, and they will be white and tender in a week or ten days.

Roses require fairly deep cultivation and heavy fertilizing up till the first of July in order to push growth and ripen the buds. After this time, however, it is advisable to slow down so that the plants may get hardened before the cold weather sets in. To aid in this process, which takes two or three months, it is a good plan to plant a few low-growing plants, such as Petunias, Calceolarias, Violas or Dwarf Nasturtiums around the roses, which will brighten up the bed and benefit the bushes by absorbing moisture. At this time a good quick-acting fertilizer is advised. After July, however, a slower fertilizer, such as liquid manure or bone meal should be used.

Too often the average flower garden is disgraced by odd shaped stakes, hoops and wires used to support tall flowers and shrubs.

Much trouble can be avoided by giving things plenty of room so that main stems are stocky and side growth develops. But certain tall plants such as Delphinium, Philox, Clematis and Dahlias require some support even when grown under the best conditions.

Otherwise, they will fall over or become entangled when hit by high winds and rain, and the flowers and leaves are stained a neutral green or brown and they will blend with the background, and will be practically hidden a few weeks after planting.

As a matter of fact, we should try to make our flowers conspicuous and not our carpenter's work.

For bushy plants like the Forsythia or Delphinium the writer has found a simple galvanizing wire circular support sufficient. Use heavy, good quality wire, made of from 16 to 20 four feet in length, depending on the height required. Put a small loop about an inch in diameter at one end, and then bend in a half circle with a foot or so left over which should be turned straight down. This will give you a circle with a support. Do the same with another piece of wire only making the circle in the opposite direction, and then fasten both ends together by putting supporting parts through the loops, thus making a complete circle with two supporting pieces at opposite sides. After a trial or two, the manufacture of these supports will be very simple. Size of the circle and length of supporting pieces will, of course, depend on the size of plant to view. These supports should be placed while growth is still short so that the plant will develop in and around the wire, thus hiding same and getting maximum support.

Climbing roses should be attached to a light wooden trellis and preferably kept a foot or more away from stone or brick walls so that foliage and blooms will not be injured by reflected heat. An old tennis net, brush or strings make best support for sweet peas.

As a rule, poultry netting should be avoided on account of the danger of cutting foliage and stems during a wind.

Great Radio Funs

Reports presented to Parliament show British radio receiving stations total more than 4,250,000, an increase of nearly 1,000,000 in the past year. Net revenue from sale of the licenses increased £200,000 (about \$735,000).

5,500,000 tons, supplied by the Dominion Government, were planted by farmers in Western Canada this spring.

Children have keener taste-sense than adults.

Dundalk, Irish Free State, has a drive against public dance halls.

4,000,000 bushels of grain will be exported this year through Churchill, Manitoba's new ocean port on Hudson Bay.

Japan oil imports are growing.

Parish Has Good Record

A committee appointed by the Parish council of Mortimer, Berkshire, England, to examine the deeds and records of the parish has reported that no document has been lost during the past 500 years.

2,000,000 bushels of grain will be exported this year through Churchill, Manitoba's new ocean port on Hudson Bay.

She Was a Great Little Boat

Recovered from the injuries he sustained when his plane crashed at North Grafton, Mass., Captain Frank Hawke, famous speed ace, is shown after his release from hospital, as he inspected the wreckage of his celebrated 'mystery' plane at East Boston Airport. Capt. Hawke was more concerned with damage done to his famous craft than he was with his own severe injuries. He will resume his flying career in a few weeks.

Visitors Allowed To See Beautiful Gardens

Number in England Open To Public At Fixed Dates

By courtesy of their owners a large number of beautiful gardens in England and Wales are open to the public at fixed dates from March to October each year, at a small charge, for the benefit of the Queen's Institute for the Blind.

By District Nursing. By permission of the King the Royal Gardens at Sandringham are opened from 11 a.m. to 4:30 p.m. every Wednesday and Thursday from May 4, during the absence of the Duke. The charge for admission is 6d. (12 cents).

High Royal Highness the Princess Royal and the Earl of Harewood are allowing the gardens at Harewood House to be open Wednesdays from 11 a.m. to 5 p.m. Admission is 1s. (24 cents).

The State Rooms will also be opened during certain hours of the day. Visitors to England and Wales will find in The Times each Saturday morning a complete list of gardens which will be open during the ensuing week. It is also possible for visitors who are intending to pass some time in the country to obtain from Lady Georgiana Mure, Queen's Institute for the Blind, 18 Victoria Street, London, S.W. 1, England, a general list for the year with dates, names of the gardens, and their owners, and in certain cases the houses, which are often of great historical interest, are open to visitors.

Parish Has Good Record

Apologized For His Age

George Bernard Shaw Says Aim Of Old Men Is To Repentance

Shaw said, addressing a crowd of meeting of undergraduates at the October Club, Oxford, said:

"It is a discouraging thing for a young man to come to a place like Oxford, where he is immediately confronted by old men, presuming on their age and deficiencies to assume the responsibility for educating him."

"I myself should have no business here, as I am 76. If it were not that I have one advantage over you young men, which is the advantage of experience."

"But I am not coming the experience stunt on you tonight. Under my capitalist society a man's experience is likely to be a thing he is the worse for; it is sure to have been a melancholy and intimidating one."

"The whole aim of old men is to perpetuate tradition, and it is largely tradition that has landed this country in the position it is in today."

"You may disregard my experience in every way, except one. Like you, I have been associated with young revolutionaries."

"My advantage, however, is that I have seen revolutionaries become middle aged, and then old men. Among my old revolutionary friends is Mr. Ramsay MacDonald."

"My recollection of Mr. Ramsay MacDonald is of a five-foot revolutionist, a Socialist, who may ask me 'Are you talking of the gentleman I heard on Empire Day who did not see any use in his head which his might not have had in the 19th century?'"

"A large proportion of you will be living in the year 1960, but many of you will not be revolutionists then. Some of you will not even be revolutionists in 1940."

The Cowboy's Waterloo

Mechanical Horse So Wild Riders Are Eventually Tamed

The cowpuncher's Waterloo, a mechanical horse, rider can now be guaranteed, rider can now be without pulling leather," promised shortly to provide a sensation for riders of the Black Hills this summer.

M. Franden, Quin, South Dakota, built the horse. It moved about the track and riders in exact duplication of the movements of the wild animal. The body of the horse, formed from an old barrel, is mounted on the wheels of a bicycle.

The jump supplied by the off centre wheels is intended by "play" in the joints and a mechanical sidestep that can be carried from side to side. A head and neck give the rider mounts the group at all, but usually the horse is thrown. The mechanical horse is a thrower. The cowpuncher is to take the horse to the tri-state roundup at Belle Fourche.

Nature's Use Of Water

Thirty To Forty Years Of Water Need To Fix Every Bushel Of Wheat

It is estimated that the average angle factor in plant life is water. The marvels of the universe is nature's use of this element as the principal medium in the growth development and transportation of consistent chemical elements from the soil and from the air for transformation into plant structure, and in this work a lot of water is used. Seven years supply carried out by experts of the Dominion Experimental Farms at Swift Current Station show, for instance, that in the production of wheat from 1,000 to 1,674 pounds of water have actually been used in the production of one pound of grain. To put it another way, for each bushel of grain produced 50 to 85.5 tons or 100 to 297 barrels of water were used. There was also found that one inch of rainfall over an acre of land is equivalent to 115 tons of water.

Wanted The Hearing

The accused was ushered into the dock. The Court was silenced, and presently the judge turned to him.

"Prisoner at the bar," he commenced, "how do you plead? Guilty or not guilty?"

The prisoner who appeared surprised, at his ease, shrugged his shoulders.

"Well, if it's all the same to you, your honor, I plead guilty and waive the hearing," he replied.

The judge was taken aback.

"Waives the hearing," he echoed vaguely. "If I have to go on with the man in the dock proceeded to explain.

"I guess I don't want to hear anything more about it," he replied.

The average woman takes the cork out of a bottle by pushing it in.

With beautiful legs like mine I must have silk stockings."—Friedman, Montreal.

Green Pastures", "Beside the
Still Waters".

A horse sale was held at Ro-
salene last Friday when 500
horses of the old Belkasi ranch
were offered for sale. Only
about 200 were sold and prices

were very low. Yearlings were
sold at \$11.50 and geldings at
\$22.00. It is said most of the
unsold lot will be shipped to the
cannery.

Thanks to the radio a number
of people throughout Canada
heard the speeches to the lead-
ing statesmen at the Imperial
Conference which opened at
Ottawa this morning.

Mr. and Mrs. L. Easton, and
family of Detroit who are on a
motor trip to Edmonton and
Peace River, stopped off here a
few days to visit the former's
deceased mother, Mrs. Easton.
They report a delight-
ful trip and are much impressed
with the scenery of our prairies
and wonderful scenic beauty of
our national parks and moun-
tains.

Dr. Donald Stoner, who spent
his boyhood days in Redcliff
and is the second son of Dr. and
Mrs. R. R. Stoner, was married
in San Antonio, Texas, last
week to Miss Olive A. Pelham
of Flemington, N. J. Dr. Don-
ald has charge of a hospital at
Flordia, Texas, and is already
making quite a name for him-
self as a surgeon. His brother
Dr. Robert, who was married
recently, is practicing in Glen-
ville, Pa.
